DETAILED ACTION

Status of the Claims

1. This action is in response to the application filed on March 4, 2002. Claims 1-78 are pending.

Election/Restrictions

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-23 and 43-51, drawn to processing the object-related information by the service such that the object-related information is available to the content bank system or the third party, classified in class 705, subclass 51.
 - II. Claims 24-26 and 52-53, drawn to modifying the object-related information to provide modified object-related information, classified in class 717, subclass 100.
 - III. Claims 27-33 and 54-56, drawn to establishing communication channel between the object and a digital identity instance, classified in class 709, subclass 201.
 - IV. Claims 34-42 and 57-62, drawn to associating contextual information with discrete components of object-related information, classified in class 380, subclass 252.
 - V. Claims 63-78, drawn to plurality of modules for processing object-related information regarding an object, classified in class 707, subclass 100.
- 3. The invention are distinct, each from the other because of the following reasons:

Application/Control Number: 10/090,550

Art Unit: 3621

Inventions I, II, III, IV and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as processing the object-related information by the service such that the object-related information is available to the content bank system or the third party. Invention II has separate utility such as modifying the object-related information. Invention III has separate utility such as establishing communication channel between the object and a digital identity instance. Invention IV has separate utility such as associating contextual information with discrete components of object-related information. Invention V has separate utility such as plurality of modules for processing object-related information regarding an object. See MPEP § 806.05(d).

- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 5. Applicant is advised that the reply to this requirement to be complete **must include an election** of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Inquire

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mary Cheung whose telephone number is (703)-305-0084. The examiner can normally be reached on Monday – Thursday from 10:00 AM to 7:30 PM. The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell, can be reached on (703) 305-9768.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1113.

The fax phone number for the organization where this application or proceedings is assigned are as follows:

(703) 872-9306

(Official Communications; including After Final

Communications labeled "BOX AF")

(703) 746-5619

(Draft Communications)

Hand delivered responses should be brought to Crystal Plaza Two, Room 1B03.

Manythowy

Mary Cheung
